is to worry that her workers aren't getting enough work done.

Remote office not required

We've talked about remotely controlling your PC from anywhere and troubleshooting other people's PCs, now it's time to have your say. If your organization entrusts you with the responsibility to get things done, this is a must-read." -David Allen, internationally best-selling author of Getting Things Done: The Art of Stress-Free Productivity "Remote is

the way I work and live. I need an answer now! But I'll lose control We paid a lot of money for this office That wouldn't work for our size or industry How to collaborate remotely Thou shalt overlap Seeing is believing All out in the open The virtual water cooler Forward motion The work is what matters Not just for people who are out of town Disaster ready Easy on the M&Ms Beware the dragons Cabin fever Check-in, check-out Ergonomic basics Mind the gut The lone outpost Working with clients Taxes, accounting, laws, oh my! Hiring and keeping the best It's a big world Life moves on Keep the good times going Seeking a human No parlor tricks The cost of thriving Great remote workers are simply great workers On writing well Test project Meeting them in person Contractors know the drill Managing remote workers When's the right time to go remote? Now that you've seen the top five, it's time to vote for the Lifehacker community favorite: The honorable mention this week goes out to Mikogo, a cross-platform remote management and online meeting platform that supports WIndows, OS X, Linux, Android, and iOS. Magazine - Cabin fever. It's richly featured and great for web conferences, remote supports Windows, OS X, Linux, Android, and iOS, and is free for personal use (up to five computers, and depending on how you use it). This is a manifesto for discarding stifling location- and time-based organizational habits in favor of best work practices for our brave new virtual and global world. It's not packed with additional features, but if all you need is to do some quick, cross-platform troubleshooting or access some files remotely, it's fast and free, and uses a web browser you probably already have installed. It's customized to your exact needs, runs all your...Read moreWhile LogMeIn is a fine product, the fact is there are other utilities out there that offer the same—or better—features to users for free, and you came through with tons of options. When you can't see someone all day long, the only thing you have to evaluate is the work. It uses existing protocols to send keyboard and mouse actions to a remote computer, and in turn it sends the screen from that remote system back to your viewer. Check out its nomination thread here. Read the rest of this chapter at Inc. Remote work gives you the power to craft your own life, and this book is a roadmap to get that." -Penelope Trunk, author of Brazen Careerist: The New Rules for Success "The decentralization of the workplace is no longer fodder for futurists, it's an everyday reality. Penenberg, author of Viral Loop: From Facebook to Twitter, How Today's Smartest Businesses Grow Themselves "Fried and Hansson show how remote working sets people free—free from drudgery and free to unleash unprecedented creativity and productive and satisfying office-less future, better for all (well, except commercial landlords)." -Adam L. Have a suggestion for the Hive Five? Lose the soul-sapping commutes. Teamviewer even supports online meetings and collaboration, so multiple people can connect to one host or share a session if they need to. Because work doesn't happen at work... It may be irrational but, if you're local, the client often feels that, if worse comes to worst, they can knock on your door. You'll have to be logged in to Chrome on any computer you want to connect to as well, which is a bit of a bummer, but the great thing is that it runs in your browser, is super-easy to set up, and it's remarkably fast. Chrome Remote Desktop Chrome Remote Desktop Supports Windows and OS X (and Linux, sort of), and is completely free for personal and commercial use. You'll need this farsighted book to prepare for this inversion." -Kevin Kelly, Senior Mayerick for Wired Magazine and author of What Technology Wants "Leave your office at the office. If you're connecting remotely across the internet, you can still do it, but you'll need to forward ports and lock things down for security's sake. Don't just complain about the top five, let us know what your preferred alternative is—and make your case for it—in the discussions below. It's one thing to download movies and TV shows to watch on your desktop or laptop, it's another to... Read more The Hive Five is based on reader nominations. The first gift copy I buy will be for my boss!" - James McQuivey, PhD, VP and Principal Analyst at Forrester Research, and author of Digital Disruption: Unleashing the Next Wave of Innovation "Just like we couldn't imagine a cell phone smaller than a toaster in the 1970's, some companies still believe that they can't get great performance from their employees unless they show up at an office. Criteria like "Was she here at 9?" or "Did she take too many breaks today?" or "Man, every time I walk by his desk he's got Facebook up" aren't even possible to tally... If you work in an office, you need to read this remarkable book, and change your life." -Richard Florida, author of the national bestseller The Rise of the Creative Class: And How It's Transforming Work, Leisure, Community and Everyday Life "In the near future, everyone will work remotely, including those sitting across from you. Those of you who praised each mentioned as much, and noted their ease of setup. Big business doesn't do it, so why should we? Even the most introverted are still part of Homeous Socialitus Erectus, which is why prisoners fear The Hole more than living with other inmates. Depending on the VNC client and server software you use, you get more features, like clipboard syncing, file sync and transfer, and more. Magazine - The Two Biggest Drags On Productivity: Meetings And Managers (Or, As We Call Them, M&Ms) These two staples of work life—meetings and managers—are actually the greatest causes of work not getting done at the office. We think she made a big mistake. Check out the nomination thread for RDC here, and for ARD here. Vote: Remote Desktop ConnectionRead moreVNCVNC, or Virtual Network Computing, is less of a specific product and more of a platform. If you live in a Windows world, for example, enabling RDC on your home server and connecting directly to it over your LAN is much easier than downloading and setting up a third party tool. The "Official" VNC software is RealVNC, which offers its client and server apps for Windows, OS X, Linux, Android, iOS, and even Chrome for free (but will happily add features and support if you're willing to pay for them). Magazine → How To Work With Clients You've Never Met Face To Face. Stop managing the chairs Meetups and sprints Lessons from open source Level the playing field One-on-ones Remove the roadblocks Be on the lookout for overwork, not underwork Using scarcity to your advantage Life as a remote worker Building a routine Morning remote, afternoon local Compute different Working alone in a crowd Staying motivated Nomadic freedom A change of scenery Family time No extra space at home Making sure you're not ignored Conclusion The quaint old office Resources Acknowledgments "REMOTE is the book that 21st century business leaders have been waiting for: a paradigm-smashing, compulsively readable case for a radically remote workplace. It's not limited to that these days though—You can use the applications, and more. The beauty of Teamviewer is that all of the features I mentioned are free, setup is incredibly easy, and the app actually has more features built-in to it than you'll probably ever really need. VNC definitely has the benefit that your data isn't passing through a third party, there are no proprietary tools or services to subscribe to, and you're in complete control. Jettison the workplace veal chambers and banish cookie-cutter corporate culture. VNC isn't difficult to set up, but it can be tricky to set up correctly—as in, in a way where there's minimal latency when you're trying to work with your computer remotely (easier said than done, especially over the Internet), VNC can communicate securely through your firewall at home, and without worrying that your home IP address will suddenly change and prevent you from connecting. If you're intrigued by extreme teleworking, but have your doubts, REMOTE is the place to address them. Check out the nominations thread here. Vote: Chrome Remote Desktop (RDC)/Apple Remote Desktop Microsoft's RDC protocol and Apple's own Remote Desktop platform both use existing technologies within each respective operating system to give remote administrators the ability to connect from anywhere they need to, access their files, troubleshoot problems, or work with files and applications as though they were using the remote device. #1 in three business categories on Amazon.com. This workday disruption is necessary if we want to use our new digital tools to full effect. And because the manager isn't sitting across from her worker anymore, she can't look in the person's eyes and see burnout... Read the rest of this chapter at the Signal vs. Those of you who nominated it praised its ability to manage multiple systems from one computer without having to remember them, the fact that Teamviewer works well without you having to make a ton of firewall modifications or do port forwarding, their support for two-step authentication, and more. Others would get jealous What about culture? On the desktop, using it is as simple as opening your browser, and you don't have to install heavy plug-ins to connect with it. For the former, working remotely means more productive teams. It's tempting to think that this kind of magic only happens when people can see and touch each other... In February 2013, Marissa Mayer, the new CEO of Yahoo!, ignited a notinsignificant controversy when she announced that employees no longer would be permitted to work from home. In fact, the further away you are from both meetings and managers, the more work Why work doesn't happen at work Stop commuting your life away It's the technology, stupid Escaping 9am-5pm End of city monopoly The new luxury Talent isn't bound by the hubs It's not about the money But saving is always nice Not all or nothing Still a trade-off You're probably already doing it Dealing with excuses Magic only happens when we're all in a room If I can't see them, how do I know they're working? The video above from Tekzilla shows you how it works. It's not perfect—Chrome Remote Desktop has no mobile apps or support at all (although the word is it's coming soon), has some trouble with multiple displays, and it's pretty featureless when it comes to things like wake-on-LAN, file transfer, streaming, and other support tools, but what you trade in heft you get back in simplicity and ease-of-use, which is exactly what those of you who nominated it praised it for. Apple's Remote Desktop on the other hand is a bit more complicated—instead of just remote access, you get complete remote management, including the ability to update software, install software, manage users, and fully support a remote computer. ARD is \$80. Windows/Mac: Mikogo sports the basic features you'd expect from a decent desktop sharing tool:...Read more Have something to say about one of the contenders? Hell might be other people, but isolation sure ain't heaven. You do have to set it up in advance though, which may make it great for remote access, but not necessarily remote support. As with most Hive Five posts, if your favorite was left out, it didn't get the nominations required in the call for contenders post to make the top five. Now I know why. RDC is free (it's not a fair comparison, feature-wise, and we're not trying to compare the two to each other.) Android/iOS: Alongside Windows 8.1, Microsoft released its Remote Desktop application today for...Read more The biggest benefits to both though is that once you're set up, and with minimal effort on the client side, you don't need to do anything else, and tyou have tons of options and features that let you manage, access, and troubleshoot the remote PC. UltraVNC is another option. Plus, there are mobile clients available. You know the feeling. It's perhaps most notable as a tool that allows you to stream audio and video across computers with minimal latency, so if you love watching movies on your tablet that are stored on your tablet that are stored on your table as a tool that allows you to stream audio and video across computers with minimal latency, so if you love watching movies on your tablet that are stored on your tablet that are an insight-packed playbook for thriving in the coming decade and beyond." -Todd Henry, author of The Accidental Creative: How to Be Brilliant at a Moment's Notice "REMOTE shows you how to remove the final barrier to doing the work you were meant to do, with the people you were meant to do it with, in the most rewarding and profitable way possible—this book is your ticket to real freedom!" -John Jantsch, author of Duct Tape Marketing: The World's Most Practical Small Business Marketing Guide Shape Up It Doesn't Have to Be Crazy at Work REWORK Getting Real Managing your own computer from afar or troubleshooting a family member's PC without being in front of it is much easier when you have a good remote desktop utility to rely on. We're simply not designed for a life of total solitude... Since both platforms use protocols built in to their respective operating systems, cross-platform support is a matter of finding a tool that works on each OS that connects to the other, and that offers the features you want. Again, not hard, but a knowledgeable hand should do it. That's the catch though—there's a VNC client and server that supports every operating system, mobile and desktop, and as long as you know what you're doing and set it up properly, you'll be able to connect to any system you control, anywhere you have internet access, completely for free. Not only does Teamviewer offer remote support and remote support and remote management—as in you don't necessarily have to have the remote side set up before you need to connect—it also sports useful features like wake-on-LAN to wake up a sleeping computer and put it back to sleep when you're finished, file transfer capabilities, clipboard passthrough, support for connecting from mobile devices like phones or tablets, and more. REMOTE shows both employees how they can work together, remotely, from any desk, in any place, anytime, anywhere. It's The Future. Your home computer is the perfect machine. It does require a little setup on the client side before you can connect too, but if your goal is to enjoy media remotely and do some light troubleshooting, it's worth a look. We understand it's a bit of a popularity contest. Check out the nominations thread here. Here are the five you recommended the most, in no particular order: When you need to access your computer when you're away from home, or troubleshoot someone else's...Read moreThe polls are closed and the votes are counted! To see which of these great remote desktop tools earned the top spot as the Lifehacker community favorite, head over to our Hive Five followup post to check out the details! Whether you're bummed about LogMeIn's recent changes or you just want a better way to troubleshoot...Read moreTeamviewerTeamviewer supports Windows, OS X, Linux, Android, and iOS, and is free for personal use. It's essentially just a Chrome app that you have to install in Chrome on any computer you want to connect to. Hey, Marissa Mayer, You've Got it Wrong: Telecommuting Isn't A Bad Thing. This week we're going to look at five of the best remote desktop and management tools, based on your nominations. The other nice thing about VNC is that because it's a simple protocol, you don't necessarily have to match client and server—you can use one server on your PC at home and a free client on your phone to connect to it. The only downside to Splashtop free is that it starts to get pricey when you really need remote access. Magazine o Why Face-To-Face Meetings Are Overrated. Noise blog o Working From Home Boosts The Quality Of The Work. Not a day goes by that I don't think about, talk about, and actually apply the insights in this game-changing book." -Susan Cain, New York Times bestselling author of Quiet: The Power of Introverts in a World That Can't Stop Talking "What you'll find in REMOTE is profound advice from guys who've succeeded in the virtual workforce arena. It's been a while since we looked at remote desktop tools, and now that one of our favorites, LogMeIn, is killing its free service, we thought it was time to take a fresh look at the field and see what's turned up. Everyone's sitting around a table, ideas are building on ideas, and intellectual sparks are lighting up the room. For the latter, there is the ultimate luxury: control over one's environment. Virtual work is the wave of the future. and Jason and David do a brilliant job of teaching best practices for both employees and based on your most popular nominations from the call for contenders thread from earlier in the week. A lot of the petty evaluation stats just melt away. RealVNC may be the official VNC software provider, but TightVNC has always been one of my favorites, and it's free.

As an employer, restricting your hiring to a small geographic region means you're not getting the best people you can. We mentioned Mikogo a while ago, and while they've come a long way and added a ton of new features (including VoIP chat), they're largely premium and enterprise-oriented (check out their pricing plans here.) They do offer free accounts for personal use though, so it's a great option if you only need to do remote support. They "know where you live." But when you're remote, they're going to be more suspicious when phone calls go unreturned or emails keep getting "lost."... This is one of the key reasons we're so enthusiastic about remote work... But the real threat is that they will wind up working too hard. Send us an email at tips+hivefive@lifehacker.com!Title photo by Greg Mote. People's homes are full of distractions Only the office can be secure Who will answer the phone? Want to make the case for your personal favorite, even if it wasn't included in the list? As an employee, restricting your job search to companies within a reasonable commute means you're not working for the best company you can. \$2/month will get you the ability to access your home computers off network, which is arguably the biggest draw of a remote access tool—so you can actually access your PC when you're away, or a friend or family member's PC without going to their house. Magazine → The True Challenge of Managing Remote Workers: People Who Work Too Hard A manager's natural instinct
